

Jelly Play

You will need:

4 packs of Jelly

A large bowl

Some animals/ any plastic small world toys you want.

Some bowls, spoons and anything else you would like to play with the Jelly.

Make the Jelly (read the instructions on the packet) and then place the items you have chosen in the Jelly. Notice how some will sink and some will float

Put your Jelly in the fridge to set. This will likely take a whole day and if you can leave it overnight that will be even better.

Now the Jelly is ready to play with. Use your spoons to scoop out the animals hiding in the Jelly and try getting it in your pots without dropping it! You could create a scene in the Jelly or use different cake cutters to create shapes. Just HAVE FUN.
