

Foamy Sand

Good clean fun for the whole family!
(Clean up is easy peasy!)

Start with some play sand, cheap shaving foam, a bowl, a wooden

spoon and a tray or a counter.

Add the shaving foam to the sand a little at a time and whip with the wooden spoon - children love to do this themselves and it smells amazing!

Do supervise younger children.

Move the foamy sand with your trucks and diggers - front loaders work really well!

Extend learning by finding out about all the different types of construction vehicles, and try to spot them when you are out on walks or on car journeys.
